Grading by the rod of 16½ feet. In grading all the Sections, the cuts will be taken out to the width and grade and used in fills before any borrow-pits are made. No borrow-pits must be made on the right of way until directed by the Commissioners or Engineer. The price paid for grading will include making all necessary connections with intersecting roads.

EATON TURNPIKE.

Section 1 begins at Station O at the bridge at Mrs. Mooney's and ends at Station 35, and is 3,500 feet or 212.1 rods long.

Bids on the foregoing Sections will be for grading, paving, masonry, sewer pipe, lumber (as required in the general specifications), and for crushed bluestone covering as required in the specifications for limestone. The bluestone allowed to be put on is the top part of the ledge it is found in, where the color is blue or where the color runs grayish and has the same hardness and characteristics as the blue, but the sandstone underlying it will not be used for covering.

For Section 4 a bid for gravel will be received to make the entire road of gravel as required in the specifications.

Bids for grading will be by the rod of 16½ feet, and in grading the contractor may build substantial walls to hold the dirt instead of filling to the slope stakes. In all cases the cuts must be taken out to the width and grade and used in the fills before any borrow-pits are made on the right of way. No borrow-pits must be made on the right of way until directed by the Engineer or Commissioners. Sandstone paving and limestone will be ten feet wide.

The price paid for grading will include making all necessary connections with intersecting roads.

In making the road through the church lot, good approaches at each end of the lot will be made and extra dirt, if required, will be spread over the fill and make a longer slope towards the church and left smooth. No dirt will be left in piles on the right of way next to the church.

Bids for masonry and tile will be for new stone and tile furnished and put in and a separate bid for removing and relaying old masonry now in the road to any place on the Section where directed by the Commissioners or Engineer.

LONG CREEK TURNPIKE.

Section 3 begins at Station 73 and ends at Station 109 plus 50, and is 3,650 feet or 221.2 rods long.

Bids on the foregoing Sections will be for grading, sandstone paving, masonry, tile and broken limestone as required in the general specifications. Sandstone paving and limestone will be 10 feet wide. Grading by the rod of 16½ feet. The dirt for fill on Section 1 will be hauled from the hill back of Mrs. Justice's house.

No borrow-pits must be made on the right of way until directed by the Commissioners or Engineer.

Raising and repairing the Johns Creek bridge and the material for same is not included in the work on Section 1.

In making the grade between the bridge and Turnpike 4, at such places where the fill will close up the ditch that has been dug by Morris Wickline for drainage, the said ditch will be widened and dug to the same depth and grade it now has.

The fill on the center of the old paving through Rising Sun will be made of sandstone McAdam. It will be made as directed and measured and paid for by the cubic yard at the bid for paving. The lower side will be widened to the 20 feet roadbed, except where the abrupt bank of the creek makes it impossible.

The work will begin immediately after the sale and bond given, and completed October 15th, 1899.
